PROFESSIONAL EXPERIENCE

Quad Insight – Trainee (Full Stack .Net) | Jul, 2026 – Present

- Hands-on training in a professional software development environment, working on backend and full-stack applications using modern .NET development practices.
- Applied Clean Architecture, MediatR, Dependency Injection, JWT authentication/authorization, API integration, and Git-based development workflows.

PROJECTS

→ Task Management System | ASP.NET Core Web API, C#, EF Core, SQL Server, Angular, TypeScript, MediatR, Clean Architecture, DI, JWT

- Developed a full-stack task management system with an ASP.NET Core Web API backend and Angular frontend.
- Applied Clean Architecture, MediatR, and Dependency Injection to structure the application into maintainable and testable layers.
- Implemented authentication and authorization using JWT and integrated secure API communication with the Angular application.
- Built RESTful APIs and connected the Angular UI with backend services for task management workflows.

→ Product Management & Order Management Integration | ASP.NET Core Web API, C#, EF Core, SQL Server, Clean Architecture, DI

- Developed Product Management and Order Management applications using Clean Architecture and Dependency Injection.
- Implemented integration between Product and Order Management APIs to enable communication across the two systems.
- Applied layered architecture and reusable backend patterns to keep business logic separated and maintainable.

→ BayTack – Full Stack Web Application | ASP.NET Core Web API, C#, EF Core, SQL Server, Identity, JWT, HTML5, CSS3, JavaScript, Git/GitHub

- Developed RESTful Web APIs for a full-stack home finishing and services marketplace.
- Implemented authentication and authorization using ASP.NET Core Identity and JWT.
- Designed and integrated the SQL Server database using Entity Framework Core.
- Applied Clean Architecture principles and collaborated with the development team using Git and GitHub.

→ College Devices Management System | System Maintenance & Full Stack Support | github.com/amr180/CollegeAssetsManagement

- Maintained and troubleshooted an existing college device management system.
- Resolved page navigation, frontend-backend communication, and server connectivity issues to improve system stability.

→ Administrative & Financial Transactions System | Software Testing – Web & Mobile

- Participated in requirements gathering and analysis and contributed to defining project requirements.
- Designed and executed manual test cases and performed API testing using Postman and Swagger.
- Tested web and mobile applications, reported defects, and verified fixes through retesting and regression testing.
